Kurdish

## Experience

**Freelance****2020-now**

I have been working as a freelancer for about 2 years in individual, team, LinkedIn, and GitHub formats, which has resulted in several practical projects.

## Projects

**Marketplace Store Project**

The online marketplace store project is implemented in the MVC format and I followed the principles of clean coding and object-oriented design. It has features such as access levels, wallet , Sales panel , discount section, warehouse, SMS system, payment gateway, shopping cart, ticketing, paging, admin panel, and product section with extensive and complete features. To prevent misuse, the project is not on GitHub.

**Online shop Project**

An online store project that is implemented in the MVC format and follows the principles of clean coding and object-oriented design. It has features such as access levels, SMS system, payment gateway, ticketing, paging, admin panel, and a product section with extensive and complete features. You can view the project from the following link in GitHub:
